## EDUCATION

Aug 2022 — Jun 2026

Computer Science, Cebu Institute of Technology - University

Cebu  
City

---

## EXPERIENCE

- Built GitJob, a LinkedIn-like job platform using Django and HTMX with job postings and user management with significant features like chat messaging and database handling.
  - Built OnlyFit, a personal gym app using HTML/CSS, PHP, and SQL with gym exercise plan and user management.
  - Explored React.js and Node.js by developing small projects to understand frontend-backend interactions.
  - Worked with REST APIs, integrating third-party services and handling data exchange between frontend and backend
  - Developed small web applications with Django, integrating authentication, CRUD operations, and databases.
  - Strong understanding of programming fundamentals, including algorithms, data structures, and OOP.
  - Continuously learning full-stack development, AI, and tech innovation.
  - 100+ problems solved at Leetcode with Python/Javascript/Java
  - Built ManageIt, a budget management web application based on the 50-30-20 rule, using Next.js, NestJS, Docker, and MongoDB to provide users with a structured way to track and allocate their finances efficiently.
- 

## Skills
