

Peter Sylvan Vecina

Cebu City, Philippines | +63 993 395 3345 | petersylvanv123@gmail.com | github.com/peterdev123

PROFILE

Computer Science graduate with a strong foundation in software development, cloud architecture, and machine learning supported by solid problem-solving skills. Experienced in building full-stack applications using MERN and TypeScript, with hands-on experience in deployment and Git version control. Familiar with .NET, data analytics, and machine learning using Python, with continuous growth in both backend and frontend development. Passionate about learning new technologies and applying problem-solving skills to build practical, real-world solutions.

EDUCATION

Bachelor of Computer Science

May 2026

Cebu Institute of Technology – University

TECHNICAL SKILL

Languages: Java, Python, C/C++, SQL (Postgres/MySQL), Javascript/Typescript

Frameworks/Platform: React.js, Node.js, Next.js, Nest.js .NET, Django, ServiceNow, AWS (EC2, S3, RDS)

Tools: Git, GitHub, Docker, Postman, Visual Studio, Cursor, Claude, V0

EXPERIENCE

ServiceNow Developer Intern

May – September 2025

Rococo Global Technologies Corporation

- Resolved incidents and built custom Business Rules and Scripts to optimize platform performance.
- Developed ATF testing and reverse-engineered workflows for technical documentation.

PROJECTS

OptiForm | *Python, PyTorch, Flutter, MediaPipe, OpenCV, Transformers*

- Developed a squat analysis pipeline using MediaPipe Pose and OpenCV to extract landmarks and detect form deviations from video.
- Integrated PEFT/QLoRA fine-tuning workflows and prepared a Flutter-based mobile architecture for practical deployment.

TreeTrace | *Typescript, Next.js, Nest.js, MongoDB, BalkanJS*

- Developed an innovative family tree and health tracking platform that leverages AI to provide intelligent insights into hereditary health patterns and family connections
- Designed and implemented a modern, responsive UI with animated transitions and interactive elements using Next.js, Framer Motion, and Tailwind CSS.

Food Detective 3000 | *Python, Flask, Tensorflow, PyTorch, ResNET50*

- Classified 35 food items with a quantized ResNet50 web app with pretrained model ResNET50.
- Responsive Flask backend processes image URLs in real-time.

Managelt | *Typescript, Next.js, Nest.js, Docker, MongoDB*

- Developed a full-stack web application with Nest.js serving a REST API with Next.js as the frontend for managing budget.

GitJob | *Python, MySQL, Django, Tailwind*

- LinkedIn-like platform developed with Django and PostgreSQL as a job platform with role-based access for job seekers and business managers.

CERTIFICATES & EVENTS

- **CS50P** | Introduction to Programming with Python – **June 2023**
- **ITPEC** | Fundamental Information Technology Engineers Certification Exam – **April 2025**
- **AWS** | AWS Cloud Architecting – **September 2025**
- **AWS** | Academy Cloud Foundations – **December 2025**
- **DICT REGION VII** | STEP-UP MADASIGON Startup Presenter – **December 2025**
- **TOPCIT** | 13th Test of Practical Competency in IT - Level III Industry Standard – **January 2026**
- **GLOBAL GAME JAM** | Cebu Global Game Jam 2026 2nd Runner up – **February 2026**
